Some features may vary by state, please check the features by area on the following page to verify or visit www.americasbuildings.com

*Tuff Shed does not use treated runners. They set the floor joists directly on the ground not allowing for any air flow beneath the building and making it difficult to move the building in the future.

WHY WE DELIVER

Our buildings are hand built in a temperature controlled environment with high quality materials. Integrity is never compromised by delivery, but increased with larger joists, studs, rafters and runners than leading competitors. This offers us the availability to build smarter and faster without the risk of on-site issues.

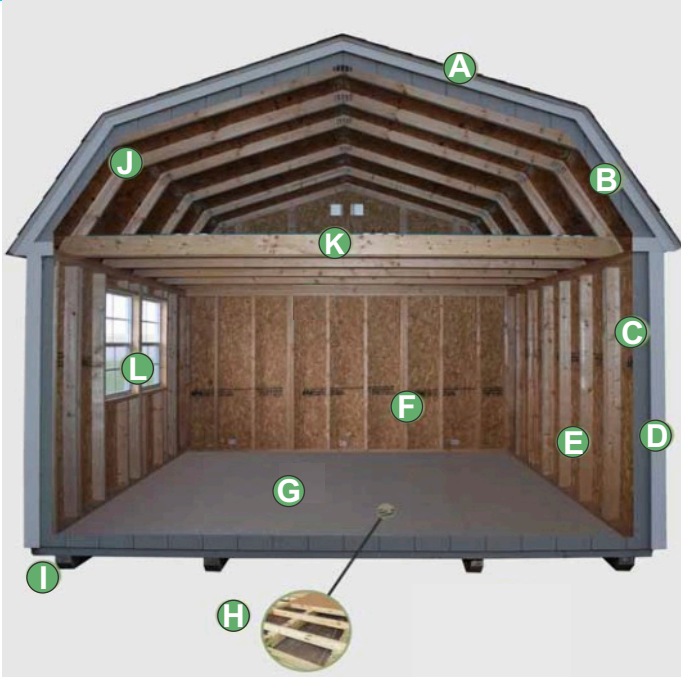

Being portable also gives the customer the option to move the building at a later date without worry.

Our professional drivers have the experience and equipment necessary to access your site safely with no mess left behind.

Mule: Available in most areas, used for tight areas and easier maneuvering

WHAT YOU GET WITH AMERICA'S BUILDINGS

Lofted Barn: Gambrel roof style with taller side wall and overall height. Includes loft for lower and upper storage.

Side Lofted Barn: Gambrel roof style with taller side wall and overall height. Side entry. Includes loft(s) for upper storage and window(s).

A-Frame/Utility: Gable roof style with taller side wall than most models. End and side entry available in most areas.

Garden Shed: Gable roof style with taller side wall than most models. Side entry. Includes window(s).

Garage: Gable and gambrel roof styles available. Includes garage door, side entry door, 3/4" floor and window.

Cabin: Gable and gambrel roof styles available. Includes entry door, porch and window(s). Porch included in dimensions.

Animal Shelters: Chicken Coops, Dog Kennels, and Loafing Sheds. Availability and features vary by location.

All pictures shown are for example purposes only. Available models, siding, features and dimensions vary by location. Please review the features by area page included in this book, visit www.americasbuildings.com or call for more info. Ramps are an available option.

PROFESSIONALLY DELIVERED

Although delivery is standard some areas may offer built on-site for an additional fee. Check with your rep about availability.

REQUIREMENTS FOR A SUCCESSFUL INSTALLATION

- Tell the customer they will be contacted shortly before delivery (5-8 weeks average) weather permitting.
- 12" of clearance around entire building (including overhangs) is required to maneuver delivered buildings.
- The installation site needs to be cleared and prepared to within 16" of level.
- Check with HOA for any special or local code requirements.
- Make sure customer is prepared for delivery and has leveling blocks, gravel or concrete pad in place before delivery. (Please see our blocking chart for more information)
- Make sure building is delivered before fence or other items are installed that could prohibit delivery.
- Prices do not include optional accessories, permits zoning, excavating, set back advice, or delivery beyond a certain mileage, please check the included distance for your area.
- Drivers in most areas will have a machine, called a mule for maneuvering the building in tight spaces.
- America's Buildings offers built on-site in *select areas*, for a fee. Please check for availability in your area if delivery is not an option for the customer.

We take pride in adding value to the communities we serve. Each area has a locally based shop to help you get the best prices on top-quality buildings. Plus, we won't charge a dime for shed deliveries within 30-50 miles of noted Lowe's stores with the availability to service stores outside these areas.
