**DELIVERY**

Building will arrive fully constructed at the customers site on a truck and trailer similar to the picture. Our delivery crew will level the building with blocks provided by the customer. If the customer has a tight spot we have a machine called a "mule", used for moving the building through the customers yard without the additional bulk and size of the truck when access is limited.

To purchase a building please go in store, ask for the contact info for the PSE / Project Specialist Exterior. The PSE sells buildings and can do a home visit. If additional information is needed go to the website below.
